One week post-operative medication instructions

23550 Park St., Ste.200
 Dearborn, MI 48124
 313-724-CARE (2273)

After your one week post-operative visit to our office, use your eyedrops in the operative eye as follows. Continue any other drops you may be using in the other eye, as instructed by your doctor. Continue any glaucoma drops unless otherwise instructed by your doctor. When you use eyedrops, wait 5-10 minutes between the different drops; don't put one in right after the other.

Cataract
 Glaucoma
 Refractive Surgery
